

The construction road is almost complete. Further work on the Wustermark 2 construction site will follow and is expected to take about 3 to 4 months.

The construction road is expected to be in use for at least two years. During construction, there may be noise, e.g. from construction vehicles and building work, as well as traffic disruption, e.g. restrictions on the B5 or changed traffic routing. We ask for your understanding.

50Hertz is using the street Am Umspannwerk for the expansion of the Wustermark substation.

The illustration above shows an example of the construction road.
